

YourGPT: A secure ChatGPT for internal data

Get a running PoC with company-specific data in less than 15 days.

ti&m has already implemented six such projects with customers as of Sept 2023.

A private ChatGPT based on company data delivered in just a few days.

"Ask your Data" - Together with your subject matter experts, we build an intelligent system to answer questions based on your company's internal data, such as PDF/Word documents, databases or Excel spreadsheets.

It operates in compliance with data protection regulations and with knowledge based (exclusively) on company data. Within a few days you will receive an executable pilot as a basis for successful integration into your applications and processes.

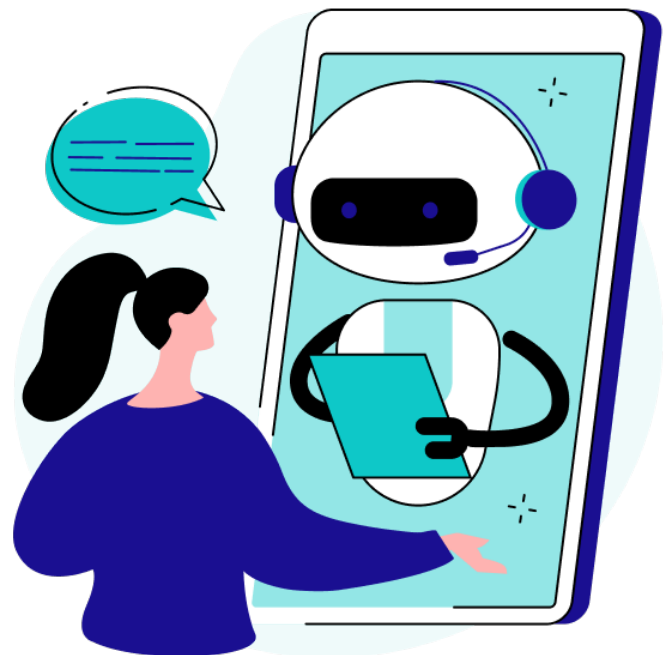

In a nutshell:

A running Pilot for less than CHF 22,000 / SGD 32,000

Based on company-specific data (up to 1000 pages of text)

Data is extracted and processed individually according to format and structure

Operated by ti&m in Microsoft Azure with professional authentication (enables integration of sensitive data)

Why ti&m

With our team of over 600 engineers, we have been among the leading technology experts for 15 years and support our global customers every step of the way on their path to digitization.
